

Standardized Patient Program Application

SPs are hired as Independent Contractors. SPs are contracted on an as needed basis to meet the needs of a Jacksonville University Brooks Rehabilitation College of Healthcare Sciences specific course. Acting experience, though not required, is beneficial for the role. It is important for SPs to be flexible, willing to learn new information, able to take direction from faculty and simulation staff, and provide constructive feedback to students.

The information below is needed to help determine the types of cases to which you might be assigned. It will not be used to exclude you from the SP program. The SP Program requires people of all body types, ages, race/ethnicities, gender identity, and states of health. This diversity represents the real-life patient population that receives professional healthcare from our undergraduate and graduate students. The information provided is kept strictly confidential. If you have questions or concerns about completing this application, please contact the Simulation and Standardized Patient Coordinator.

Applicant Information

Full Name: _____ Date: _____
Last *First* *M.I.*

Are you a current Jacksonville University student? YES NO

If yes, what is your current program and year? _____

Do you have a relative/family member who is a current student at Jacksonville University? YES NO
